Looking for a challenging role in a reputable organization to utilize my technical and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

Experience	
Logistic Infotech	2023-08-28 - Present
React Native Developer	
https://www.logisticinfotech.com/	
As a React Native Developer at Logistic Infotech, I contributed to the development and enhancement of a live application, focusing on building and optimizing features to improve user experience. I worked closely with the team to implement various functionalities, manage state efficiently, and ensure smooth navigation throughout the app. I collaborated on integrating third-party libraries to extend the app's capabilities and helped streamline the application's performance through effective state management and component design. My role also involved ensuring seamless data management and enhancing the overall responsiveness of the application.	
Tech Stack:	
Redux , React Navigation , Hooks , Function Components , Styled Components , Axios , React Animation , AsyncStorage , Third-party libraries	
BinaryGeckos	2023-01-10 - 2023-08-25
React Native Developer	
https://binarygeckos.com/	
As a React Native Developer at BinaryGeckos, I started my career with extensive training and hands-on experience working on various live projects. This opportunity allowed me to build a solid foundation in application development, with an emphasis on creating user-centric designs and delivering scalable, high-quality applications that address real-world challenges.	
Tech Stack:	
React Native , React Navigation , Axios , AsyncStorage , Third-party libraries	
Education	
Marwadi University	2019/08/01 - 2023/06/15
Computer Engineering	B.Tech
Higher Secondary Education	2017/08/01 - 2018/06/15
Science A Group	12th
Secondary Education	2016/08/01 - 2017/06/15

Projects Developed for Companies	
WeCollect	
Description: A cutting-edge NFT marketplace that redefines digital collectible trading. The platform empowers users with features like buying, selling, minting, and offer-based purchasing of NFTs. It includes social elements such as 24-hour stories, real-time chat, and push notifications to keep users engaged and updated. The app supports deep linking for seamless navigation across shared content. With WebSocket-based live updates and support for 10+ languages, WeCollect delivers a secure, immersive, and globally accessible NFT experience. Tech Stack: React Native, React Navigation, Redux, Styled Components, WebSocket, AWS S3, AsyncStorage, In-App Purchase, i18n, Notifications, Deep Linking.	
Sonata	
Description: An innovative therapeutic sound app offering healing frequencies. Features include premium sound collections, custom frequency blending, and cloud syncing for personalized sessions. Tech Stack: React Native, React Navigation, Styled Components, AsyncStorage, AWS S3, REST APIs, Hooks, In-App Purchases.	
LawHub	
Description: AI-based legal assistant for document management and legal consultations. Features real-time chat, multilingual support, and intelligent document analysis. Tech Stack: React Native, React Navigation, Styled Components, AsyncStorage, REST APIs, i18n, AI Integration.	
Treamo	
Description: A robust food delivery platform offering real-time order tracking, multilingual support, and Redux-managed state for seamless UX. Tech Stack: React Native, React Navigation, Redux, Styled Components, AsyncStorage, REST APIs, i18n.	
Personal Projects Developed Using AI	
BillingBuddy	
https://github.com/devzaveri/BillingBuddy	
Description:	
BillingBuddy is an AI-powered mobile application designed to simplify bill splitting among groups by intelligently identifying items, calculating individual shares, and minimizing manual input. It enhances social dining experiences by eliminating common pain points in expense division.	
Key Features:	
- Intelligent bill parsing and fair share distribution logic. - Real-time group expense overview with auto-updated totals. - Support for partial payments, tip calculation, and bill summary generation. - AI-driven logic to suggest item owners based on past patterns (e.g., who usually orders what). - Offline support with secure local storage.	
Tech Stack:	
Frontend: React Native, React Navigation, Styled Components State Management: Context API & Custom Hooks Storage: Firebase Firestore for cloud data, AsyncStorage for local persistence Authentication: Firebase Auth AI Integration: - AI logic written using rule-based decision-making and intent prediction. - Context-aware recommendations for item splitting. Other Tools: Custom modal and reusable UI components, form validations	
Impact:	
- Reduced average bill settlement time by 80%. - Optimized for usability during real-world scenarios like restaurants, trips, and group events.	

DearMe	
https://github.com/devzaveri/DearMe	
Description:	
DearMe is a beautifully crafted personal diary app focused on privacy, simplicity, and emotional well-being. The app offers a secure space for users to record their daily thoughts, memories, and reflections. Although the app itself does not include built-in AI functionalities, it was ideated, structured, and partially developed with the assistance of AI tools to optimize UX patterns, component architecture, and design decisions.	
Key Features:	
- Daily journaling with intuitive UI. - Secure and private local storage using AsyncStorage. - Organized entries with date-based sorting and tagging. - Responsive dark/light mode for user comfort. - Clean and distraction-free interface inspired by minimal mental health tools.	
Tech Stack:	
Frontend: React Native, React Navigation, Styled Components State Management: Redux Toolkit Storage: AsyncStorage for local persistence Development Process: - AI tools (like ChatGPT) were used to assist in UI planning, component design, and feature brainstorming. - Auto-generated boilerplate and reusable components improved development speed and maintainability.	
Impact:	
- Delivered a distraction-free journaling experience. - Helped early users improve their writing consistency and mindfulness habits. - Demonstrated efficient use of AI tools in the app development lifecycle.
